STILLWATER COUNTY ROAD & BRIDGE

PAVEMENT PRESERVATION PLAN

The Road & Bridge Dept. is starting a new pavement preservation program, in 2024, and will be completing an annual inspection of all asphalt roadways within the County. These asphalt roadways will be ranked for possible preservation candidates with the work being completed during the fall and winter months. Prioritized roadways will then be budgeted, and depending on the available funding, will determine how many roads will be completed that year.

Funded projects will be completed by a qualified contractor through a competitive bid process. All the road milling and planing, as well as prep work will be done by road and bridge personnel.

Treatments may include asphalt, chip seal, slurry seal, crack sealing, or other approved methods. A yearly map identifying the funded projects will be added to the Stillwater County website showing selected roads and the estimated time of construction when available.

starting 2024 in Reed Point, 2025 in Absarokee and 2026 in Park City.
