STILLWATER COUNTY ROAD & BRIDGE

IMPROVED ALLEYWAY MAINTENANCE PLAN

The Road & Bridge Dept. is starting a new alleyway maintenance program, and will be completing an annual inspection on the improved alleyways in Stillwater County. After the annual assessment is completed, the Road & Bridge Dept. will determine how many alleyways are in need of maintenance work, and the severity of that maintenance work. Most of the work will be completed during the fall and winter months, with asphalt preservation maintenance done in the summer months.

Currently, there are 39 developed alleyways in the county. Maintenance will be done on a minimum of 8 alleyways a year, starting in the fall of 2024. It is the goal of the Road and Bridge Dept. to complete the maintenance on all 39 developed alleyways in four years. There will also be tree trimming within the ROW and coordination with the utility companies or districts to move any of the utilities higher or lower for emergency vehicle access.

Please see the attached map for the first set of proposed alleyway improvements.

If you have any questions in this regard, email: kstrecker@stillwatercountymt.gov.
